Quality Profile

Munster Technological University (MTU)

Institutional Review 2024

Type of Institution:
University

CINNTE

THE REVIEW TEAM COMMENDS:

1. The development of a coherent Strategic Plan, *Our Shared Vision 2022–2027*, that has established a clear mission, vision and set of guiding values for the new university.

2. MTU on the commitment, resilience, and professionalism of staff in ensuring a positive student learning experience.

3. MTU on its visible and inclusive student-centred culture that widens access to higher education.

4. The establishment of extensive and effective regional, national, and global government, industry and community partnerships.

5. MTU on the extensive and visible contribution of the university to achieving the primary objective of a technological university in supporting the region's economy, community, and education.

Review Handbook

Terms of Reference

THE REVIEW TEAM RECOMMENDS:

1. That MTU improve governance of quality assurance and enhancement by establishing a more comprehensive scheme of delegation in which roles, responsibilities and accountabilities of the Governing Body, Academic Council and their sub-committees, together with the Executive, are made more explicit and transparent.

2. The establishment of the new University Executive be expedited and clear responsibilities identified for the Vice-President together with clear structures, roles and responsibilities at all levels reporting to Executive members.

3. That MTU establish more formal, robust, transparent, and documented processes and mechanisms to supplement and complement the existing system of networks and relationships upon which the current approach to quality is over-reliant.

4. The development of a comprehensive people and talent strategy that ensures recruitment, retention, development, and diversification of staff to drive and deliver the ambitions of the strategic plan, with national and international benchmarking.

5. That MTU enhance the student voice at programme level through the development of a uniform system of representation at formal academic decision-making fora, and implement a fit-for-purpose, university-wide system of independent evaluation of the student learning experience at both module and programme levels.
